*A combination of elegance and rustic sophistication describes this stone & cedar shake home. The expansive floor plan was designed so every room has a corridor to offer views of the nearby riding ring, galloping trails, and the natural beauty of the landscape.*

*The home features a gourmet kitchen surrounded by custom cabinetry and a one-of-kind glass and stone mosaic backsplash. Elements of the owner's suite include a two-sided stone fireplace, private screened porch, and an elegant spa bathroom. The home entry is flanked with natural stone walls,*

*elegant stained moldings, interior water features, distressed plank flooring, and hand-honed cedar beams.*

*The exterior of the home welcomes visitors with a courtyard driveway featuring eco-friendly stone pavers and a soothing water feature. Tennessee building stone anchors the foundation and lap-style cedar siding compliments the ebony stained cedar beams. The natural landscape at the rear of the property is complimented by a personal putting green, hot tub, swimming pool and over 3000 square feet of entertainment space.*

Ricardo and Bobbie Fisher

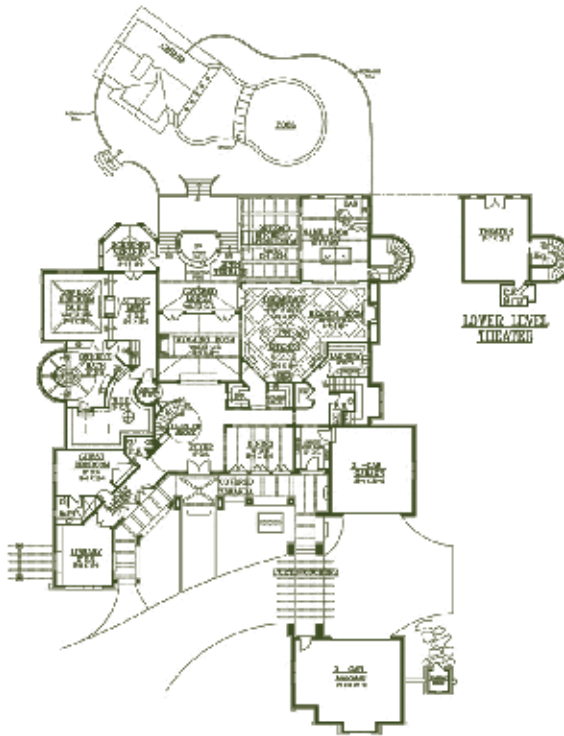

**ANDERSON CUSTOM HOMES, INC.** was founded on the philosophy that the personal involvement of the homeowner is the best way to ensure customer satisfaction. We pride ourselves in building client and supplier relationships. With over 15 years of construction and real-estate experience Ricardo and Bobbie Fisher along with the team at Anderson Custom Homes, have committed themselves to building distinguished custom homes that fit each client's unique lifestyle.

Throughout the years we have built relationships with homebuyers and business associates that have withstood the test of time. Our wealth of experience and education has given us an understanding of what is required to provide quality and value in a home.

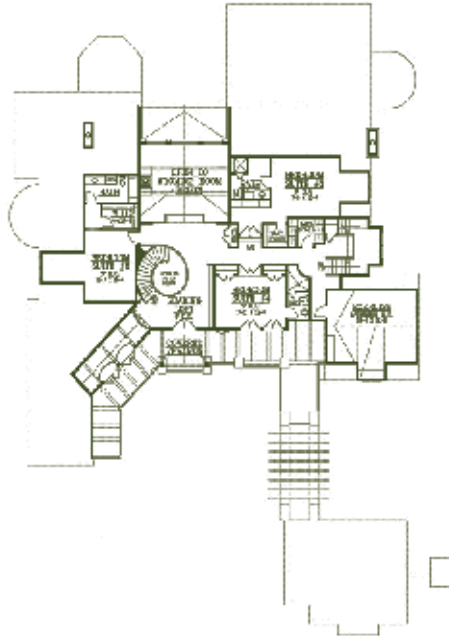

Each client works closely with a Construction Manager that personally oversees the details, from planning to groundbreaking to the final inspections. Frequent and regular communication with ONE person, both on and off the jobsite, ensures a steady flow of information and gives each client the personal attention they deserve.

It is our goal to ensure complete customer satisfaction throughout the building process and long after. Our homes feature brick, stone, stucco and cedar shake exteriors, expansive outdoor living spaces, and interiors that are designed to meet each client's distinctive needs.
